BEAR'S PLUMBING CASE STUDY

BEAR'S PLUMBING GENERATES 256 MARKETING-QUALIFIED LEADS IN 2025

HOW DISCIPLINED GOOGLE ADS MANAGEMENT DELIVERED PROJECT-READY PLUMBING DEMAND AT SCALE.

Services: Google Ads, Website Design
Industry: Plumbing
Go-Live with Hook: June 2024 (17 months)

When Bear's Plumbing partnered with Hook Agency, the priority was clear: **scale lead volume without sacrificing quality or profitability**. They needed a paid strategy that could produce consistent demand from homeowners ready to start plumbing projects, not just clicks or casual inquiries.

The solution was a tightly controlled Google Ads system built around intent, understanding seasonality, and protecting spend.

THE RESULTS AT A GLANCE

- **256 marketing-qualified leads generated in 2025**
- **$226.63 average cost per *project-ready* lead**
- **$124 average cost per conversion**
- **$6,345.74 monthly ad budget** managed efficiently

These were homeowners actively looking to book plumbing work, including high-intent services like water heater replacement, not low-quality form fills.

Scaling Volume Without Losing Control

From the beginning, the focus was on protecting efficiency as volume increased. To do that, we implemented a **TCPA (Target Cost Per Acquisition)** strategy to prevent overspending on marginal conversions while still capturing demand.

Optimization wasn't occasional, it was continuous.

Key actions included:

- **Weekly keyword refinements** to eliminate low-performing terms
- Excluding **low-intent search queries** that wasted budget
- Using a mix of **phrase and exact match keywords** to control CPC
- Applying **location-based keywords** to concentrate spend in top-performing cities

This created a system that could scale without chaos.

Optimizing For Conversion And Seasonality

Plumbing demand shifts throughout the year, and campaigns were adjusted accordingly to match homeowner intent in real time.

We:

- Optimized **landing pages by season** to improve relevance and conversion
- Added **client promotions** to ads and landing pages to increase response rates
- Implemented a **remarketing campaign** to re-engage previous visitors
- Used **product-specific keywords**, especially for water heaters, to target ready-to-buy homeowners

These refinements helped turn traffic into booked jobs, not just impressions.

WHY THIS CASE STUDY MATTERS

Bear's Plumbing's success wasn't driven by spending more, it came from **spending smarter**.

Today, they benefit from:

- Hundreds of **marketing-qualified, project-ready leads each year**
- A predictable **$226 CPL** in a competitive plumbing market
- Paid campaigns that adapt to service mix and seasonality
- A scalable system designed for long-term growth

This is what happens when paid search is managed with discipline, intent, and experience.
