SPEEDY WATER HEATERS CASE STUDY

SPEEDY WATER HEATERS GENERATES 158 MARKETING-QUALIFIED LEADS IN A HIGHLY COMPETITIVE CALIFORNIA MARKET

HOW PAID SEARCH AND FOUNDATIONAL SEO HELPED A FAST-GROWING PLUMBING BRAND CUT THROUGH THE NOISE.

Services: Google Ads, **SEO**, Website Support
Industry: **Plumbing** / Water Heaters
Time with Hook: 13 months

When Speedy Water Heaters partnered with Hook Agency, the company was already growing fast, starting at **$2M in revenue**, but faced a new challenge: standing out in one of the **most competitive plumbing markets in the country**.

They had just completed a full rebrand with Kickcharge and needed a marketing partner who could not only implement the new brand across their website and ads, but also turn that momentum into **consistent, qualified lead flow**.

THE RESULTS AT A GLANCE

- **158 marketing-qualified leads generated from PPC in 2025**
- **$227.31 average cost per project-ready lead (CPL)**
- **$136 average cost per conversion (CPC)**
- **$3,300 monthly ad budget** managed efficiently

These were homeowners actively searching for water heater installation and replacement, high-intent, service-ready leads in a crowded market.

STATS AT A GLANCE

Data shown reflects the first 12 months of performance (2025 Data)

$3.3K	$136	$227	158
Google Ads Budget	Cost per Conversion from Google Ads	Cost per Qualified Lead from Google Ads	Marketing Qualified Leads

Pain Points

While Speedy Water Heaters didn't come in frustrated with past agencies, they did face real obstacles:

- Needed help **implementing a new rebrand** across website and paid ads
- Operating in an **extremely competitive California market**
- Required a strategy that could **cut through heavy ad competition**
- Wanted leads that were **ready to book**, not just clicks

The challenge wasn't getting attention, it was earning it profitably.

Cutting Through Competition With Paid Search

Google Ads became the primary driver of demand, with campaigns built specifically around **product-level intent**. Rather than competing broadly in general plumbing searches, strategy focused on capturing homeowners who already knew what they needed, especially water heater services.

Campaigns were structured to:

- Compete effectively in **high-cost California auctions**
- Control CPC while maintaining impression share
- Align ad messaging with the new brand identity
- Drive traffic to pages built for conversion, not just clicks

Despite the competitive landscape, Speedy Water Heaters maintained efficiency while scaling lead volume.

Supporting Growth With Foundational SEO

Alongside paid search, **foundational SEO** work ensured the website was positioned for long-term growth. This included implementing the new brand across key pages, tightening site structure, and improving clarity around core services.

While **PPC** drove immediate demand, SEO created a foundation that supports credibility, trust, and future organic growth, especially important in a market where homeowners compare multiple providers before booking.

WHY THIS CASE STUDY MATTERS

Speedy Water Heaters' success shows that even in one of the most competitive plumbing markets in the U.S., smart execution still wins.

Today, they benefit from:

- **158 marketing-qualified leads in a single year from PPC**
- A predictable **$227 CPL for project-ready water heater jobs**
- Paid campaigns that align with a premium brand identity
- A marketing system designed to scale alongside revenue growth

This is what happens when paid search, brand execution, and foundational SEO work together to cut through the noise, and convert demand into real jobs.
